

L New Lighting Requirements and Lighting Efficiency Workshop **G**

Living Greener

In July 2012, new lighting energy-efficiency legislation went into effect. This workshop, presented by the Division of Compliance Assistance and industry experts, will cover the changes being implemented in the lighting industry and how upgrades can help your facility save energy and money. It will also give attendees a look at the future of lighting as new technologies emerge.

What you will learn:

- Learn about how legislation impacts lighting
- New and evolving technologies in the lighting industry
- How lighting upgrades can have a positive impact on your facility's bottom line
- Ways to finance projects
- LEDs and the future of lighting

Who should attend?

- Industrial facility managers
- School district representatives
- Hospitals
- Grocery stores
- Retail establishments
- Builders
- Anyone who is in charge of facility decisions regarding lighting.
